**Need to knows:**

To help us respond to you efficiently and accurately, please take a moment to answer the following questions:

What type of machine/equipment are you planning to control via wireless?

How many functions in total do you need to control? Please describe each function.

What type of outputs do you require to control these functions:  
relays, proportional (0-10V), pwm, etc?

If relay outputs, please specify which functions are to be momentary and latching.  
Single or dual speed

What is the power supply voltage you will be using to feed our receiver?

Is there any feedback required? If feedback is needed, will it be LEDs or Screen?  
What are the inputs - 12VDC (LED) 4-20mA, 0-10 VDC, other?

What is the desired operating range?

Is there any communication via protocol required?  
CAN, ProfiNET, ProfiBUS, ETHERNET/IP, or discreet outputs

Where are you planning to mount the receiver (inside an enclosure or exposed)?

How many systems are you looking to purchase?

Which country would be the final destination for this system?

Is there anything else we should know?
